Where to Submit Your Manuscript

Send manuscripts to:

Donald Levy, Editor
The Journal of Chemical Physics
Department of Chemistry
5735 S. Ellis Ave.
The University of Chicago
Chicago, IL 60637 USA

Telephone: 773-702-7067
FAX: 773-702-8314
E-mail: editor@jcp.uchicago.edu

A **covering letter** should specify authors, title, Journal, the corresponding author's e-mail address, and any special requests. Unless otherwise stated, submission of a manuscript will be understood to mean that the paper has been neither copyrighted, classified, published, nor is being considered for publication elsewhere.

Manuscripts may be submitted in one of two ways:

(a) **Electronically** via web submission at <http://jcp.uchicago.edu/>. All electronic submissions must go through this website. Authors should not send manuscripts to the Editorial Office as e-mail attachments.

(b) **Printed manuscripts** by conventional mail (2 copies) to the address shown above.

A duly signed [transfer of copyright agreement form](#) is required for publication in this journal. No claim is made to original U.S. Government works.

Authors are invited to suggest appropriate referees for the manuscript. They may also request that specific people not be used as referees, and they may include reasons for such a request. In both cases, these suggestions must be advisory to the editors, not a condition of submission. Authors submitting manuscripts that contain material critical of, or in conflict with, previously published work of other authors should bring this fact to the attention of the editors. In such cases, the editors will usually ask an author of the previously published work to review the new manuscript as an interested party. The identity of the interested party is made known to the authors of the new manuscript and to subsequent independent and anonymous referees.

Authors whose manuscripts have been accepted for publication will receive correspondence informing them of the issue for which it is tentatively scheduled and instructions for transmitting electronic files to AIP Production. Date of publication may be before the cover date of the issue. Authors may access publication data for their manuscripts online through AIP's [AMSIS service](#).

Proofs and all subsequent correspondence pertaining to papers in the production process should be addressed to:

Editorial Supervisor
The Journal of Chemical Physics
American Institute of Physics
Suite 1NO1
2 Huntington Quadrangle
Melville, NY 11747-4502 USA

Telephone: 516-576-2442 or 2448 or 2423
FAX: 516-576-2643
E-mail: jcp@aip.org

Reference must be made to the AIP identification number, title, author, and scheduled issue date. A limited number of alterations in proof are unavoidable, but the cost of making extensive alterations after the article has been typeset may be charged to the author. Please *do not* address correspondence about proofs, reprints, artwork, publication charges, etc., to the Editor. To do so simply delays the appropriate action and response.

Accepted Manuscript Status Inquiry System (AMSIS): Through the [AMSIS homepage](#), authors may access information about their accepted manuscript during the production process at AIP. AMSIS can be used only by authors of accepted manuscripts; direct requests about papers still under review to the [Editorial Office](#).

General information regarding [publication charges](#), [color charges](#), [copyrights](#), and similar material may be found on the inside front cover of each issue. See general information for authors [here](#).

How to Prepare Your Manuscript

For general format and style, consult recent issues of the Journal and the 1990 Fourth Edition of the [AIP Style Manual](#), published by the American Institute of Physics and available free-of-charge for downloading.

Three types of manuscripts are acceptable: **full length**, **Communications**, and **Letters to the Editor**. For Communications and Letters, as

- **Ensure that lettering and lines are dark enough, and thick enough, to reproduce clearly**, especially if reduction is necessary. Remember that fine lines tend to disappear upon reduction.

Additional Guidelines for Preparation of Electronic Graphics Files:

- Do not send electronic graphics files to AIP Production until your paper has been accepted for publication and you know the corresponding nine-character AIP identification number for your paper (e.g., 001301JCP). **Instructions** for preparation and transmission of electronic graphics files to AIP Production may be found [here](#).

Statement of Ethics and Responsibilities of Authors Submitting to AIP Journals

This journal is published as part of the charter of its publisher, the American Institute of Physics (AIP), to advance and diffuse knowledge of the science of physics and its applications to human welfare. To that end, it is essential that all who participate in producing the journal conduct themselves as authors, reviewers, editors, and publishers in accord with the highest level of professional ethics and standards.

A detailed statement of what this journal expects is available [here](#).

By submitting a manuscript to this journal, each author implicitly confirms that it meets the highest ethical standards.

How to Transmit Your Accepted Manuscript Electronically

Compuscripts: AIP accepts the following author-prepared electronic text files for use in production: REVTeX, LaTeX, or Microsoft Word. If you are interested in transmitting an electronic file, please indicate so in the cover letter that accompanies your original submission. Also include an e-mail address. Do not send an electronic text file to AIP Production until your manuscript has been accepted. Details and instructions may be found [here](#).

AIP uses translation software to convert REVTeX, LaTeX, and MS Word files into Xyvision composition files for production. Each file will be evaluated for appropriateness; authors will receive notice with their galley proofs as to whether or not their file was used, along with a feedback form detailing any problems encountered in processing the file.

The **REVTeX Toolbox** and the **Word Author Toolkit**, as well as general information regarding AIP's compuscript program, are accessible [here](#).

Manuscript Preparation Checklist

Use this checklist to avoid the most common mechanical errors in submitted manuscripts.

1. The manuscript must be one-sided only and must be double-spaced *throughout*.
2. Number *all* pages in sequence, starting with the title page.
3. Type *title* and *abstract* on a separate first page.
4. Type (double-spaced) list of *references* (including footnotes), list of *figure captions*, and *tables* on pages separate from each other and from the main text.
5. Type *references* in the style used by this journal.
6. If submitting hardcopies, submit (a) two clear copies of the manuscript with clear copies of figures and (b) the original high-quality figures.
7. The original figures must be identified by figure number and author's name and must be in the final published size, not oversized.
8. Mail a signed AIP Transfer of Copyright Agreement Form to the [JCP Editorial Office](#). A blank copyright transfer form is available [here](#).
